JUAN PABLO RESTREPO

FRONTEND DEVELOPER

+4 years of experience specializing in the JavaScript ecosystem, building complete web solutions from modern, interactive user interfaces to scalable backend services. Proven track record working on real production products, optimizing platforms with high data volumes, integrating third-party APIs and automating workflows. Expert in prompt engineering and AI-assisted code development to enhance code quality, and boost productivity. Strong collaboration in agile teams and contributions to innovation and UX improvement. Upper-intermediate English (B2 certified).

PROFESSIONAL EXPERIENCE

Software Engineer FrontEnd Responsive Sr in Softtek

August 2025

KEY RESPONSIBILITIES & ACHIEVEMENTS:

- Implemented a GitHub Copilot-powered code-review bot that cut human errors by 50% and doubled code-quality scores.
- Earned formal client recognition for Collaboration, highlighting cross-team alignment and efficiency.
- Translated ambiguous Jira tickets into robust and documented implementations.

Skills: Event Management Software, Prompt Engineering , Unit Testing, Next.js, Typescript, Jest.

Junior Experience Technology Engineer in PGD

January 2024 – June 2025

KEY RESPONSIBILITIES & ACHIEVEMENTS:

- Automated QA for RTE email templates, slashing test time from 30 min to <1 min (≈97% time saving).
- Designed and developed dynamic DSPs (Dynamic Sales Presentations) for a healthcare client.
- Built and deployed full delivery flows through Veeva Vault and Salesforce

Skills: Pharmaceutical Industry, Veeva RCM, Salesforce,, React, JavaScript, NestJS, Veeva Vault, Salesforce.

Frontend Developer in iFactum

February 2023 – December 2023

KEY RESPONSIBILITIES & ACHIEVEMENTS:

- Implemented real-time chat features enabling interaction between buyers, sellers, and support staff.
- Developed a live-streaming virtual auditorium platform for product showcases and live events.
- Built and maintained a fully functional e-commerce experience with shopping cart, payment logic, and inventory system.

Skills: Event Monitoring Software, Live Streaming Software, Live Chat Software, React, JavaScript, Sass.

Fullstack Developer in Sioma

June 2021 – November 2022

KEY RESPONSIBILITIES & ACHIEVEMENTS:

- Developed data analysis and transformation algorithms for large-scale datasets in a big data environment.
- Automated the generation of reports for over 500 users, reducing manual operations workload.
- Reduced page render time from 30 s to 5 s (83% faster) by optimizing memory usage and using background tasks.
- Decreased API response time from 50+ seconds to ~7 seconds by restructuring raw database queries and refactoring backend logic in Laravel.
- Modernized a legacy web platform, refactoring critical components with scalable and modular technologies.

Stack: Agricultural Engineering, Big Data, Startup Industry, Laravel (PHP), JavaScript, MySQL, Tailwind CSS, React.js.

TECHNICAL SKILLS

Frontend

React.js • HTML5 • Next.js • TypeScript • JavaScript • Design Frameworks • Tailwind CSS • Responsive Design • Progressive Web Apps

Backend & Others

Supabase • NestJS • Node Js • MySql

AI & Productivity

GitHub Copilot • Prompt Engineering • AI-Assisted Development • Custom AI Agents

Testing & Tools

Jest • Unit Testing • Postman • API Integration • Git

CERTIFICATIONS

- Prompt Engineering in **Platzi** (November 2023)
- Typescript in **Udemy** (April 2024)

SOFT SKILLS

Adaptability • Analytical thinking • Teamwork • Effective communication

EDUCATION

Bachelor's Degree in Systems Engineering

Universidad Catolica Luis Amigó (2017 - 2022)

Technical Degree in Computer Systems

Instituto Centro de Sistemas de Urabá

English Language Studies (B2 Certified)

Centro Colombo Americano de Medellín

LANGUAGES

- Spanish (Native)
- English (B2 – Upper Intermediate)
